

Commercial Ice Flake Production Machine

This ice flake machine is a robust solution for producing high-quality ice flakes. Designed for commercial use, it offers a reliable and consistent ice supply with stainless steel construction and electronic controls.

Product Overview

Commercial Flake Ice Solution

This high-capacity flake ice machine is engineered for demanding commercial environments such as supermarkets, shopping malls, and hotels. It features a robust stainless steel construction ensuring durability and hygiene, with an automated microcomputer-controlled cooling system for reliable, consistent performance. Designed for ease of use, the unit includes digital temperature monitoring and simple installation requirements, making it an ideal choice for food cooling and fresh-keeping applications.

Performance & Capacity

Daily Production Capacity

400 KGS

Minimum Daily Output

50000 KGS

Maximum Daily Output

Operational Features

Installation

- Pre-tested before delivery
- Simple water pipe connection
- Standard power connection required
- Easy cooling system and cylinder setup

Control System

Microcomputer Control, Digital Thermostat, Remote Monitoring

Technical Specifications

Construction

Stainless Steel • Top-grade Components

Special Configurations

- Marine-grade design available
- Seawater cooling compatibility
- Seawater ice-making capability

Logistics

Packaging

Air bubble film inner layer with wooden box exterior
