

Commercial Ice Lolly Production Machine

This specialized refrigeration unit efficiently produces ice lollies. It incorporates a powerful refrigeration system with a control panel, multiple molds, and a durable exterior.

Overview

Professional Ice Lolly Production

This commercial-grade ice lolly production machine is engineered for high-volume output in warm climates. Featuring advanced refrigeration technology with international-standard compressors and patented energy-saving systems, it ensures stable, rapid freezing performance. The unit is designed for durability and ease of use, arriving pre-tested and ready for immediate installation in your commercial facility.

Technical Specifications

Compressor Origin	USA, Italy, Japan
Power Protection Features	Yes
Installation Requirement	Plug-and-play; requires only water pipe and power connection

Logistics

Packaging

- Air bubble film (inner)
- Wooden box (outer)
