Overview

High-Performance Commercial Ice Maker

This commercial-grade ice maker is engineered for high-speed production and reliable performance in demanding environments like restaurants, bars, and cafes. Constructed from high-grade stainless steel, the unit features a fully automatic operation with a self-checking mode for enhanced reliability. With a compact footprint and efficient air-cooled system, it provides an optimal balance between ice storage capacity and production rates.

Performance & Capacity

Daily Production Capacity

50 kg/24h
Production

Storage Capacity

10 kg

Technical Specifications

Weight (G.W./N.W.)

Type	Weight
Gross Weight	45 kg
Net Weight	40 kg

Refrigerant

R134a/R290

Cooling System

Air cooled

Unit Dimensions (LxWxH)

398 x 542 x 732 mm

Features & Compliance

Operational Features

- Fully automatic operation
- Advanced self-checking mode
- 4 adjustable feet
- Requires water & waste connection
- Includes ice scoop
