

Commercial Iced Fruit Drink Dispenser

This commercial-grade dispenser is designed for serving iced fruit drinks in high-volume settings. It features a multi-flavor dispensing system and maintains optimal serving temperatures with its refrigeration system.

Overview

Professional Beverage Dispensing Solution

This commercial iced fruit drink dispenser is engineered for high-volume beverage service in demanding environments like restaurants, cafes, and bars. Featuring advanced pneumatic pump control and a high-performance imported water pump, it ensures consistent flow and reliable operation. The unit is built with food-grade 304 stainless steel piping, prioritizing hygiene and durability for long-term professional use.

Performance & Technical

Refrigeration Performance
