Product Overview

Professional Commercial Noodle Production

This commercial-grade noodle making machine is engineered for high-efficiency, consistent performance in demanding restaurant kitchens. Featuring a durable cast-iron vertical plate structure and precision-ground rollers, it ensures reliable operation for various noodle types. The unit integrates safety features like magnetic control switches and overload protection, combined with a robust copper wire motor for long-term durability.

Key Features

Design & Safety

Stainless Steel Construction, Magnetic Control Switch, Shockproof Non-slip Mat, Overload Protection, Emergency Stop Button

Technical Specifications

Construction Materials

- Cast iron vertical plates
- Stainless steel chassis
- External grinding finish rollers

Motor Type

National standard copper wire motor

Drive System

Chain driving
