Product Overview

Commercial Nut Slicing Solution

This commercial slicing machine is specifically engineered for processing almonds and peanuts into uniform slices. Constructed with durable, rust-resistant stainless steel, it is designed for food processing environments that prioritize hygiene and longevity. The machine features an adjustable slicing mechanism, allowing operators to achieve precise slice thicknesses to meet specific production requirements.

Technical Specifications

Slice Thickness

0.05 mm

Minimum Thickness

1.2 mm

Maximum Thickness

Maintenance & Care

- Wear-resistant cutting blades
- Anti-rust body construction
- Easy to clean design

Materials

Stainless Steel, High Speed Steel

Service & Support

Warranty Coverage

Category	Detail
Standard Warranty	1 Year
Coverage	Manufacturing defects
Maintenance	Lifelong support
