

Commercial Pouch Laminator

This commercial laminator is designed for high-volume lamination tasks. It features robust construction and precise temperature control to ensure professional-quality lamination for documents, photos, and other materials.

Product Overview

High-Efficiency Commercial Laminator

This commercial pouch laminator is engineered for high-volume lamination tasks, offering robust performance and consistent results. Designed for office, educational, and commercial environments, it features precise control settings to handle various pouch sizes effectively. The high-speed operation ensures professional-quality lamination for documents and photos without curling.

Performance Specifications

Laminating Speed

600 mm/min
Minimum Speed

1500 mm/min
Maximum Speed

Warm-up Time

90 seconds

Compatible Film Thickness

80 to 250 microns

Safety & Features

Key Advantages

- Variable heat settings
- High-speed operation
- Anti-curl technology
- Professional-grade construction

Safety Features

Auto Shut-off, Overheat Protection
