Product Overview

High-Efficiency Commercial Scroll Compressor

This commercial refrigeration scroll compressor is engineered for medium and high-temperature applications, offering reliable performance for demanding industrial environments. It is suitable for diverse setups, including aquatic product storage, small-scale cold storage facilities, and centralized air conditioning systems. Designed for both air-cooled and water-cooled configurations, this unit ensures consistent cooling capacity and operational durability.

Technical Specifications

Cooling Methods

- Air-cooling
- Water-cooling

Suitable Applications

Medium Temperature, High Temperature, Aquatic Products Industry, Small-scale Cold Storage, Central Air Conditioning
