Product Overview

Professional Grade Refrigeration

This six-door commercial refrigerator is engineered for high-demand professional kitchen environments. Constructed from durable stainless steel, the unit provides a robust storage solution with advanced temperature management via a digital controller. Its modular interior design and adjustable shelving offer the flexibility required for various food service applications, ensuring optimal food safety and quality preservation.

Technical Specifications

Key Components

- Digital temperature controller
- Reliable compressor system
- Full foaming insulated cabinet
- Inner copper pipe coils
- Auto-reset doors

Functionality	Freezer, Chiller, Dual Function
Number of Doors	6
Construction	Stainless Steel

Operational Features

Mobility	Yes
Design Focus	Modular Design, Easy Maintenance, Industrial Use
