Overview

Commercial High-Capacity Soft-Serve Machine

This high-performance, floor-standing soft-serve ice cream machine is engineered for demanding commercial environments such as hotels, restaurants, and chain stores. Featuring a multi-flavor dispensing system with three nozzles, it allows for simultaneous serving of two distinct flavors or a swirl mix. The unit is built with a robust stainless steel exterior for durability and hygiene, while its advanced refrigeration system ensures fast cooling and consistent performance.

Technical Specifications

Model Number	CF36S2
Total Power	1.6 kW
Voltage	220V~
Frequency	50 Hz
Refrigerant	R404a
Refrigerant Charge	450 g

Physical Properties

Mobility Mounted on wheels	
Net Weight	110 kg

Features

Key Features

- Digital control panel
- Stainless steel construction
- Efficient heat dissipation ventilation
- Large capacity hoppers

Dispensing System

3-nozzle multi-flavor system
