Product Overview

High-Performance Commercial Soft-Serve Solution

This robust soft-serve ice cream machine is engineered for high-efficiency cooling and rapid production, making it an ideal choice for hotels, restaurants, and chain stores. Designed with durability and hygiene in mind, the unit features a stainless steel construction and a user-friendly control interface. Its flexible configuration allows for multiple flavor dispensing, ensuring consistent quality and high throughput for busy commercial environments.

Technical Specifications

Dispensing System	Three-handle system (single or dual flavor)
Feed Type	Gravity Feed, Pump Feed
Body Material	Stainless Steel
Mobility	Yes

Performance Metrics

Cooling Efficiency

Rapid Cooling • Stable Performance • High Efficiency

Customization Options

- Adjustable Power
- Adjustable Voltage
- Adjustable Frequency
