

Commercial Sugarcane Juice Extractor

This heavy-duty sugarcane juice extractor is designed for commercial applications. Constructed from stainless steel, it efficiently crushes sugarcane to extract juice, featuring robust rollers and a high-torque motor.

Overview

Professional Sugarcane Juice Extraction

This heavy-duty commercial sugarcane juice extractor is engineered for high-efficiency juice production in demanding environments like restaurants, juice bars, and food processing facilities. Constructed from durable, food-grade stainless steel, the unit ensures hygiene and longevity while maximizing juice yield through a robust, high-torque roller system. Designed with operational safety and convenience in mind, it includes integrated emergency stop features, a streamlined waste disposal chute, and mobility wheels for flexible placement.

Technical Specifications

Material	Stainless steel
Key Features	High-torque motor, Waste disposal chute, Juice collection tray, Mobile design

Safety & Compliance

Safety Mechanisms

- Emergency stop button
- Protective safety guards
