Overview

Professional Refrigeration Solution

This commercial undercounter refrigerator is engineered to combine efficient storage space with a robust workstation, making it ideal for high-paced food preparation environments. Featuring a durable stainless steel exterior and interior, the unit is built for longevity and easy sanitation. With advanced features like a digital controller and a removable cassette-type condensing unit, it offers both precise temperature management and simplified maintenance for busy foodservice operations.

Construction & Design

Design Features

- Adjustable 150mmH legs
- Removable cassette type condensing unit
- Removable evaporator for easy cleaning

Material Composition

Stainless Steel Exterior, Stainless Steel Interior, Galvanized Steel Back, Galvanized Steel Base

Performance & Control

Cooling System

Forced Air Cooling • Self-Evaporating Condensation

Control Interface

Yes

Drainage Required

No
