

Commercial Upright Display Refrigerator

This upright showcase is designed for commercial use, featuring a transparent glass door for product visibility. It includes adjustable shelving and an internal cooling fan to maintain a consistent temperature.

Overview

Professional Commercial Display Solution

The LC-558 upright display refrigerator offers a robust cooling solution for retail environments, featuring a high-efficiency fan cooling system and a glass door for superior product visibility. With adjustable shelving, interior LED illumination, and a user-friendly manual defrost system, this unit is engineered for versatile product storage and merchandising. Its mobile design and professional-grade steel interior liner ensure both operational flexibility and long-lasting durability in demanding commercial settings.
