Product Overview

High-Efficiency Commercial Refrigeration

This commercial upright refrigerator is engineered for peak performance in demanding professional kitchen environments. It features a top-mounted, modular refrigeration system for easy maintenance and a patented frequency-variable cooling technique to significantly reduce energy consumption. With durable stainless steel construction and advanced smart-control diagnostics, it provides reliable, eco-friendly food preservation.

Technical Specifications

Insulation Thickness	75 mm
Ambient Operating Temperature	0°C to 43°C
Compatible Refrigerants	R134a, R404a

Design & Features

Door Functionality

- Self-closing design
- Over 90° opening
- Audible and visual alarm
- Optional ITO glass door

Customization Options

- Half-door to drawer conversion
- Adjustable legs or castors
- Interchangeable temperature cassette units

Interior Specifications

Feature	Details
Corner Design	Rounded for easy cleaning
Trayslides	Adjustable anti-tilt
Drawer Load Capacity	50 kg
