

Commercial Vehicle Brake Booster Assembly

Heavy-duty brake booster assembly designed for commercial vehicles. It ensures efficient brake force amplification for enhanced safety and control with its robust construction.

Product Overview

Heavy-Duty Brake Booster Assembly

This heavy-duty brake booster assembly is engineered specifically for commercial vehicles, providing reliable performance under demanding operational conditions. The unit includes a high-quality diaphragm, push rod, and essential mounting hardware to ensure seamless integration. By delivering efficient brake force amplification, this assembly enhances safety and control for heavy-duty air brake systems found in trucks and buses.

Technical Specifications

Included Components

- Diaphragm
- Push rod
- Mounting hardware

Application System

Air Brake Systems

Compatible Vehicles

Trucks, Buses, Commercial Vehicles

Performance Features

Key Benefits

Heavy-duty construction • Enhanced safety • Efficient force amplification
