

Commercial Water Heater

This water heater is designed for commercial use. It provides hot water for HVAC systems and other applications.

Product Overview

High-Efficiency Commercial Water Heating

Designed for demanding commercial environments, this industrial-grade water heater provides consistent and reliable hot water delivery for high-rise buildings and commercial facilities. Its robust construction ensures long-term performance under heavy usage, making it an ideal choice for modern urban infrastructure. This unit combines rapid recovery times with energy-efficient operation to meet the rigorous standards of professional facility management.

Performance Metrics

Recovery Rate

120 L/min

Flow Output

85 %

Thermal Efficiency

Certifications

Compliance Badges

ISO 9001 • CE Certified • Energy Star Rated

Technical Specifications

Technical Details Table

Feature	Specification
Installation Type	Vertical Floor Standing
Energy Source	Electric
Tank Material	Stainless Steel
Max Temperature	85°C

Features

Key Advantages

- Corrosion-resistant internal lining
- Advanced digital temperature control
- Low-maintenance heating elements
- Overheat protection safety system
