

Common Rail Fuel Injector Control Valve

F00RJ01218

This fuel injector control valve is designed for common rail diesel injection systems. The valve regulates fuel flow within the injector, ensuring optimal engine performance.

Product Overview

Precision-engineered control valves designed for optimal fuel regulation and engine performance in diesel injection systems.

High-Precision Common Rail Control Valve

This fuel injector control valve is designed for high-precision regulation of fuel flow and pressure within common rail diesel injection systems. Engineered to exacting tolerances, it ensures optimal engine performance, enhanced fuel efficiency, and minimized emissions. It serves as a reliable replacement component for various international diesel engine and injection system standards.

Technical Identification

Part Number	F00RJ01218
Product Type	Common Rail Fuel Injector Control Valve

Compatibility

Compatible Replacement For	BOSCH, ZEXEL, DENSO, DELPHI, STANADYNE, YANMAR, Delphi-Lucas-CAV, AM-BAC INTERNATIONAL
Aftermarket Service Support	Cummins, Caterpillar, IVECO

Manufacturing & Quality

Manufacturing Experience

28 yrs
Years in Industry

Production Method	Automated manufacturing using machinery from Germany and the U.S.A
