

Communication Antenna

This is a communication antenna. It is used for transmitting and receiving signals.

Product Overview

High-Performance Communication Antenna

This professional-grade communication antenna is engineered to provide reliable signal transmission and reception in demanding environments. Designed with durability and optimal connectivity in mind, it serves as a critical component for robust network infrastructure. Its streamlined construction ensures minimal wind load while maintaining high gain performance for consistent data throughput.

Technical Specifications

Antenna Type	Communication Antenna
Mounting	Pole Mount, Outdoor

Compliance & Standards

Certifications
RoHS • CE
