

# Communication Device with RJ45 and Coaxial Connectors

The communication device features multiple connectivity options. It is designed for reliable data transmission and network integration.

## Overview

### High-Performance Communication Gateway

The E1000-2c.LINK is a robust communication device engineered for reliable data transmission and seamless network integration. Featuring a versatile interface with both RJ45 and coaxial connectivity, it is designed to support diverse networking environments. Its compact, ventilated black casing ensures efficient thermal management and durability for continuous operation.

## Connectivity

### Network Interfaces

- 2 x RJ45 Ports
- 2 x Coaxial Connectors

### Power Input

DC Power Input

## Physical Characteristics

### Controls

Reset Button

### Housing

Black plastic casing with ventilation
