

Communication Radio Module

High-performance radio communication module designed for integration into electronic systems. It features multiple indicator LEDs, RF connectors, and a robust enclosure for reliable operation in demanding environments.

General Overview

High-Performance Communication Radio Module

This high-performance radio communication module is engineered for seamless integration into complex electronic systems. Featuring a robust, durable enclosure, it is designed to maintain reliable data transmission in demanding industrial environments. The module is equipped with dedicated RF and AF interfaces, making it a versatile solution for professional communication infrastructure.

Interface and Connectivity

Interface Ports	RF Connector, AF Interface
Receiver Capacity	20 channels

Operational Features

Enclosure Type	Robust Enclosure • Industrial Grade
Indicator LEDs	Yes
