

Commuter Motorcycle with Single-Cylinder Engine

This is a standard motorcycle designed for street use. It features a round headlight, black fuel tank, wire-spoke wheels, and a single-cylinder engine.

Overview

Efficient Commuter Motorcycle

This commuter motorcycle is engineered for efficiency and reliability, featuring a high-performance OHC engine designed to minimize fuel consumption while maintaining power. With a large 14.5-liter fuel tank, it is built to handle long trips with fewer stops. Safety is prioritized with a responsive 240mm front disk brake system, making it an ideal choice for daily professional or personal commuting.
