

Commuter Motorcycle with Step-Through Frame

This is a standard commuter motorcycle with a step-through frame. It features a single-cylinder engine, front and rear suspension, and a rear luggage rack.

Overview

Commuter Motorcycle with Step-Through Frame

This commuter motorcycle features a practical step-through frame design, making it an accessible and convenient choice for daily urban transport. The bike combines a reliable single-cylinder engine with a balanced suspension system, ensuring a stable ride for the operator. With added utility features like a rear luggage rack and distinct chrome styling, it is built to handle both passenger comfort and light cargo needs efficiently.
