Product Overview

Professional Compact Wine Storage

This 18L thermoelectric wine cooler is designed for precision temperature control and optimal wine preservation. Featuring a vibration-free cooling system and a stylish transparent door with integrated lighting, it provides the perfect environment for up to six standard bottles. Its energy-efficient, eco-friendly design makes it an ideal solution for countertops and professional hospitality spaces requiring reliable performance.

Technical Specifications

Performance Metrics

18 L

Volume

56 W

Power Consumption

9 KG

Net Weight

Temperature Range	5 to 22 degrees Celsius
Input Voltage	100-240V AC / 12V DC
Dimensions (L x W x H)	52cm x 24.5cm x 40cm

Features & Construction

Material Composition

- ABS Plastic housing
- Solid polyurethane foam insulation
- Transparent door

Key Features	Thermoelectric Cooling, Vibration-Free, CFC & HCFC Free, Adjustable Temperature, Interior Lighting
