

Compact Agricultural Tractor with Rotary Tiller

This compact tractor is designed for various agricultural tasks. It features a rear-mounted rotary tiller, enhancing its versatility for soil preparation and maneuverability in tight spaces.

Overview

Versatile Compact Agricultural Tractor

This series of compact 4x4 tractors offers a robust solution for small to medium-sized farming operations. Designed for efficiency, these units feature water-cooled diesel engines and rear-mounted rotary tiller compatibility for effective soil preparation. Their compact footprint ensures excellent maneuverability in confined spaces while maintaining reliable power and performance for various agricultural tasks.

Performance

Key Performance Metrics

13.2 kW

Max Power

4.3 kN

Max Rated Traction

3.5 m

Turning Radius

Technical Specifications

Dimensional Data

Metric	Value
Overall Dimensions (LxWxH)	2285x1200x1665 mm
Structure Weight	685 kg
Min Operating Weight	805 kg
Wheelbase	1400 mm
Ground Clearance	225 mm

Engine Details

Engine Technical Data

- Type: Single Cylinder, Vertical, Water-cooled, 4-stroke Diesel
- Fuel Consumption: d251.6 g/kW*h
- Rated Speed: 2200-2400 rpm
- Displacement: 0.7 - 0.996 L

Available Engine Models

DL190-12, DLH1100, DLH1105

Operating Features

Drivetrain & Transmission

- Drive Type: 4x4 Wheel Drive
- PTO Type: Non-independent, Clockwise, 6-Spline, 540rpm
- Suspension: O Category, Rear 3-Point Mounted
- Tires: 6.00-14 Front / 7.50-20 Rear
