

Compact Air Cooling and Circulation Unit

This compact unit provides both refrigeration and ventilation. It is designed for efficient air cooling and circulation in commercial and industrial environments.

Product Overview

Compact Air Cooling and Circulation Unit

This compact refrigeration and ventilation unit is engineered for efficient air cooling and circulation in demanding commercial and industrial environments. Featuring a streamlined, durable white casing, the unit is designed for versatile installation on walls or ceilings. It ensures consistent temperature management and superior air quality control while providing reliable, long-term performance with simplified maintenance requirements.

Technical Features

Best For

- Commercial Applications
- Industrial Environments

Design Type

Compact refrigeration and ventilation

Mounting Options

Wall Mount, Ceiling Mount

Performance Highlights

Operational Focus

1 Active

Consistent Temperature Control

1 Active

Air Quality Management
