

Compact Air Purification Device

This compact device is designed for air antivirus purification. It is suitable for improving air quality in small spaces by removing airborne particles and viruses.

Product Overview

Compact Air Purification Solution

This compact air purification device is engineered to enhance indoor air quality in small spaces. Featuring a streamlined, modern design with a distinctive leaf-shaped ventilation grill, it is specifically optimized for air antivirus purification. Its efficient airflow system helps remove airborne particles and viruses, making it a practical addition to personal workspaces or small rooms.

Design and Build

Color	White
Design Features	Compact, Streamlined, Leaf-shaped grill

Functionality

Best For	Small spaces • Personal use
Primary Function	Air antivirus purification
