Product Overview

Compact Air Purification Solution

The AP1210 is a compact air purifier designed to enhance indoor air quality in small to medium-sized spaces. Featuring a comprehensive 4-stage purification process, it effectively captures airborne particles such as dust, pollen, and smoke while neutralizing odors. With quiet operation and energy-efficient performance, this unit provides a reliable solution for maintaining a cleaner, more comfortable breathing environment in homes or offices.

Performance & Filtration

Filtration System

- Pre-Filter
- HEPA Filter
- Activated Carbon Filter
- Ionizer

CADR

120 m³/h

Clean Air Delivery Rate

Noise Level < 50dB

Applicable Area 14 m³

Technical Specifications

Power Consumption	30 W
Voltage Range	110-220V
Wind Speed Settings	3

Dimensions & Weight

Product Dimensions	242 x 242 x 310 mm
Net Weight	1.5 KG

Logistics & Customization

Packaging & Branding	Gift Packaging, Color Inner Box, Carton Outer Box, Customizable Packaging, Private Logo Available
