Overview

Compact Performance for Confined Spaces

This mini road roller is a highly efficient construction machine engineered specifically for asphalt compaction and soil stabilization in tight, confined areas. Featuring a robust steel drum and a reliable engine, it delivers consistent compaction force to ensure smooth, professional-grade surfaces. Its compact maneuverability makes it an ideal solution for sidewalks, pathways, and small-scale construction or landscaping projects.

Key Features

Design Highlights

Compact Size • Robust Steel Drum • Ergonomic Controls • High Maneuverability

Primary Applications

Asphalt Compaction, Soil Stabilization, Sidewalk Paving, Landscaping, Maintenance Work

Technical Details

Compaction Performance

2 drums

Drum Configuration

Model Information

Attribute	Value
Model Series	HS600
Equipment Type	Mini Road Roller
