Overview

Intelligent Portable Charging Solution

This compact battery charger features an integrated, portable design engineered for convenience and reliability. Equipped with two-level temperature control and an automotive-grade MCU, it ensures stable and efficient power delivery. The unit is built for safety, featuring IP67-rated waterproof protection and flame-retardant materials, making it a robust choice for various charging environments.

Technical Specifications

Ingress Protection

IP67

Input Compatibility

16A Socket, 10A Socket

Flame Retardant Standard

UL94 V-0

Features

Safety Functions

- Eight-level protection system
- Automotive-grade MCU chip
- Ultrasonic welding for sealing
- Two-level temperature control

User Interface

- Intelligent LED real-time status display
- Abnormal status indicator lights
- Automatic gun head pop-up function
