

# Compact Binoculars with 10x and 16x Magnification

These compact binoculars offer both 10x and 16x magnification options. They feature adjustable eye width, coated lenses, and a lightweight design suitable for outdoor activities.

## Overview

### Compact Optical Precision

These compact binoculars provide versatile magnification options of 10x and 16x, designed for portability without compromising performance. Featuring a Porro prism system and fully coated lenses, they ensure clear, reliable imagery for professional and recreational use. The ergonomic design includes a center focus system and adjustable eye width to accommodate various user preferences.
