Product Overview

Advanced Air Revitalization

This compact air purifier and sterilizer utilizes advanced siphon-based air scrubbing technology to create a cyclonic water film, effectively eliminating dust, allergens, and airborne microorganisms. Designed for versatility, it operates via USB and functions as both an air purifier and a humidifier, releasing fresh, aromatic air. Ideal for small spaces like vehicles, it combines efficient sterilization with a built-in LED light for a comfortable and inviting atmosphere.

Technical Specifications

Power Consumption

5 W

Operating Power

0.4 W

Standby Power

Input Voltage	DC 5V
Noise Level	40.6 dB(A)
Effective Coverage	10 sqm

Design & Build

Product Dimensions	6.7 x 6.7 x 12.5 cm
Materials	PP, PET
Water Bowl Capacity	200 ml

Features

Key Features

- Siphon-based air scrubbing technology
- Built-in LED ambient lighting
- USB-powered operation
- Compatible with essential oils and disinfectants
- Multi-stage filtration (Water film, Ionizer)
