

# Compact Ceramic Fan Heater with Overheat Protection

This compact ceramic fan heater uses a PTC (Positive Temperature Coefficient) heating element for efficient heating. It includes safety features like overheat protection and has a sleek silver and black finish.

## Overview

### Compact Ceramic Heating Solution

This compact ceramic fan heater is designed for efficient and safe heating in smaller environments. Utilizing advanced PTC (Positive Temperature Coefficient) heating technology, it provides consistent warmth while maintaining a sleek, modern aesthetic with a silver and black finish. Built with user safety as a priority, the unit includes integrated overheat protection for worry-free operation.

## Technical Specifications

Heating Element	PTC (Positive Temperature Coefficient)
