

# Compact Ceramic PTC Space Heater

This is a compact and efficient PTC (Positive Temperature Coefficient) heater designed for personal space heating. It features a ceramic heating element and includes safety features like overheat protection and a tip-over switch.

## Overview

### Efficient Personal Heating Solution

This compact ceramic PTC space heater is engineered for rapid and consistent warmth in personal workspaces or small rooms. Utilizing advanced ceramic heating technology, it provides efficient supplemental heat while maintaining a sleek, space-saving design. Advanced safety systems, including automatic tip-over protection and thermal overheat sensors, ensure reliable operation in any professional or home environment.

## Performance

### Key Performance Metrics

**1 PTC**

Heating Technology

## Features

### Functional Settings

- Adjustable temperature settings
- Oscillation function for even distribution

### Safety Protections

Overheat Protection, Tip-over Automatic Shutoff

## Design

### Recommended Use

Office • Bedroom • Small Spaces
