

Compact Ceramic Space Heater

This ceramic space heater provides 750W or 1500W of heating power. It features cool, warm, and hot wind selection, overheat protection, a safety tip-over switch, and 90-degree oscillation.

Overview

Efficiency Meets Portability

The Compact Ceramic Space Heater is a versatile solution for personal and small-room climate control. Utilizing advanced ceramic heating technology, it provides rapid and consistent heat output, while the integrated 90-degree oscillation ensures even warmth distribution. Designed with user safety at the forefront, the unit features reliable overheat protection and an automatic tip-over safety switch.
