

Compact Chain Block and Lever Hoist

This compact chain block and lever hoist is designed for lifting and pulling applications in confined spaces. It features robust steel construction, a high-strength alloy steel chain, and a safety latch on the hook for secure load attachment.

Overview

Compact Lifting Solution

This compact chain block and lever hoist is specifically engineered for lifting and pulling applications in confined spaces. Built with robust steel construction and a high-strength alloy steel chain, it ensures durability and reliability for demanding tasks. It features a safety latch on the hook to provide secure load attachment, making it an ideal choice for maintenance, construction, and automotive environments where precise and controlled lifting is essential.

Technical Specifications

Design Type

Compact • Portable

Construction Material

Robust Steel

Chain Material

High-strength Alloy Steel

Safety Features

Hook Mechanism

Safety Latch, Secure Attachment

Applications

Primary Applications

- Maintenance
- Construction
- Automotive
- Confined space operations
