

Compact Computer Case with Indicator Lights

This computer case is compact and robust, designed for various applications. It features a durable enclosure with ventilation slots and front panel indicator lights for power, HDD, storage, and printer status.

Overview

Compact and Robust Enclosure

The TOW-S2350UN is a compact and robust computer case engineered for versatile professional applications. Designed with optimal thermal management in mind, it features integrated ventilation slots to ensure reliable operation of internal components. The front panel provides immediate status visibility through a dedicated array of indicator lights, making it an ideal solution for secure and organized component housing.
