

Compact Cooling Fan for Electronic Devices

This compact cooling fan is designed for efficient heat dissipation in electronic devices. Featuring a durable plastic frame and impeller, it provides reliable airflow with low noise operation.

Product Overview

Compact Cooling Solution

This compact cooling fan is engineered for efficient heat dissipation in environments where space is at a premium. Designed with a robust plastic frame and impeller, it offers a reliable balance of consistent airflow and quiet operation. It is an ideal choice for integrating into electronic enclosures, computer systems, and diverse industrial equipment.

Technical Specifications

Key Benefits

- Compact form factor
- Low noise operation
- Durable construction
- Easy installation

Suitable Applications

Electronic Enclosures • Computer Systems • Industrial Equipment

Materials

Plastic Frame, Plastic Impeller
