

Compact Desktop Air Purifier with Color Indicator

This desktop air purifier features a simple design and a built-in color indicator. The color indicator changes between blue, green, purple and red based on detected air quality.

Product Overview

Compact Air Purification Solution

The AP1207 is a compact and efficient air purification system designed specifically for personal use in small spaces like bedrooms, offices, and nurseries. It utilizes a robust multi-layer filtration process to effectively remove common pollutants including dust, pollen, pet dander, smoke, and household odors. With its quiet operation, adjustable fan speeds, and energy-efficient design, it provides a seamless and unobtrusive way to improve indoor air quality.

Filtration System
