

Compact Digital Camera with 3x Optical Zoom

This is a compact digital camera with a 3x optical zoom lens. It features a 10-megapixel sensor, a focal length of $f=6.2-18.6\text{mm}$, and an aperture of 1:2.8-5.2.

Overview

Compact Digital Imaging Solution

This compact digital camera is designed for versatile everyday photography, featuring a robust 10-megapixel sensor for clear, high-quality image capture. Equipped with a 3x optical zoom lens, it provides the flexibility needed to frame subjects effectively in various environments. Its sleek silver finish and portable form factor make it a practical choice for professional documentation or on-the-go imaging needs.
