

Compact Digital Personal Scale

This personal scale features a 6mm tempered glass platform for safety and durability. It accurately measures weight up to 150kg with overload and low battery indicators.

Product Overview

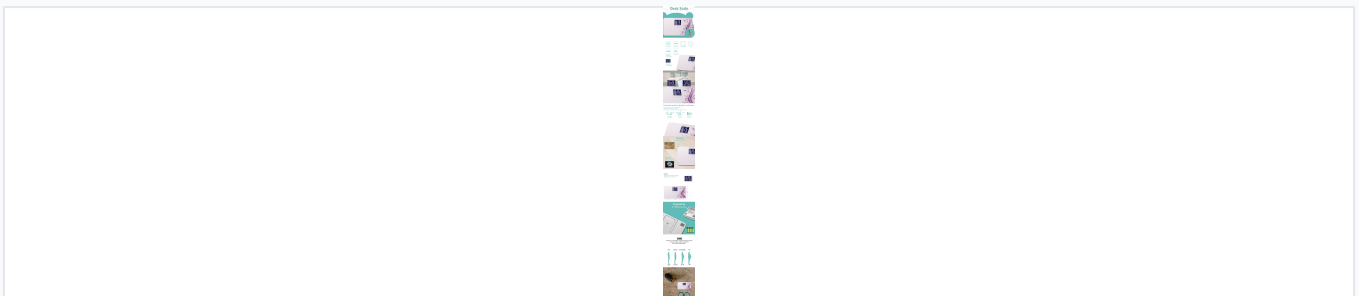

Compact Digital Personal Scale

This compact digital personal scale combines precision measurement with a space-saving design, making it ideal for modern environments. Featuring a high-precision strain gauge sensor and a durable tempered glass platform, it offers reliable weight tracking up to 150kg. The integrated multi-function LCD display provides clear readings for weight, time, and environmental data, while smart features like BMI calculation and auto-off functionality ensure user convenience.

Technical Specifications

Maximum Capacity	150 kg
Graduation	100 g
Platform Material	Tempered glass
Power Source	3 x 1.5V AAA batteries

Dimensions & Display

The multi-function LCD display provides comprehensive data including weight, BMI, time, and environmental conditions.

Scale Dimensions	230 x 140 x 24mm
LCD Display Size	40 x 50mm

Features

Advanced Health Metrics

- BMI (Body Mass Index) Calculation
- Time Display
- Alarm Function
- Temperature Monitoring
- Humidity Monitoring

Key Features

High Precision Sensor, Auto-Off, Step-On Technology, Overload Indication, Low Battery Indication
