

Compact Electric Cutter for Tile and Stone

This compact electric power tool features a circular diamond blade for cutting hard materials like tile, stone, and concrete. A water cooling system reduces dust and friction, enhancing cutting efficiency and extending blade life.

Overview

Compact Electric Cutter for Professional Use

This compact electric power tool is engineered for precision cutting of hard materials, including tile, stone, and concrete. It features an integrated water cooling system designed to minimize dust and friction, which significantly enhances cutting efficiency and extends the lifespan of the diamond blade. With an adjustable cutting depth and a robust protective guard, this tool offers professional contractors and DIY enthusiasts a safe, reliable solution for demanding cutting tasks.

Technical Specifications

Tool Type	Electric Power Tool
Compatible Materials	Tile, Stone, Concrete
Cooling System	Yes

Features

Cutting Adjustments

- Adjustable cutting depth
- Protective safety guard

Ideal For

Professional Contractors • DIY Enthusiasts

Blade Type	Circular Diamond Blade
