

Compact Electric Juicer with Pulp Container

This compact electric juicer is designed for efficient juice extraction. It features a durable plastic housing, a transparent juicing chamber, a detachable pulp container, and includes a collection cup.

Product Overview

Compact Electric Juicing Solution

This compact electric juicer is engineered for efficient juice extraction in environments where space is at a premium. Constructed from durable ABS plastic and high-quality Tritan, the unit features a transparent chamber for monitoring and a detachable pulp container for simplified maintenance. It offers a reliable and convenient solution for small-scale juice preparation needs.

Technical Specifications

Power Performance

150 W

Rated Power

220 V

Voltage

50 Hz

Frequency

Materials

ABS Plastic, Tritan

Design Features

Included Components

- Transparent juicing chamber
- Detachable pulp container
- Direct-dispense collection cup
