

Compact Electric Space Heater

This compact electric space heater is designed for household use. It features multiple heating elements for rapid warmth distribution, making it ideal for personal or small area heating.

Overview

Compact and Efficient Heating

The QH-1000D is a compact space heating apparatus engineered for effective warmth distribution in smaller environments. Designed with multiple heating elements, it provides rapid heat-up times, making it an ideal solution for personal heating needs or small area climate control. Its efficient design ensures consistent performance for household applications.

Technical Specifications

Key Features

- Compact design
- Multiple heating elements
- Rapid warmth distribution

Model Number	QH-1000D
Application	Household, Personal Heating, Small Area
