

Compact Electric Space Heater with Adjustable Thermostat

This compact electric heater is designed to heat rooms of 15-25 square meters. It features a PTC heating element for efficient and safe heat generation, along with adjustable temperature settings and overheat protection.

Product Overview

Compact Comfort Solution

This compact electric space heater is engineered for efficient and safe personal heating in small environments. Utilizing advanced PTC (Positive Temperature Coefficient) heating technology, it ensures consistent warmth while maintaining operational safety. The unit features intuitive controls, including dual knobs for easy adjustment of heat settings and the thermostat, housed in a sleek, space-saving design.

Technical Specifications

Controls

- Dual control knobs
- Adjustable thermostat
- Variable heat settings

Heating Element

PTC (Positive Temperature Coefficient)
