

Compact Electric Tile Saw

This compact electric tile saw features a powerful motor for cutting ceramic, porcelain, and stone tiles. An adjustable cutting depth, water cooling system, and durable base ensure precision and stability for DIY and professional use.

Product Overview

Compact Electric Tile Saw

This compact electric tile saw is designed for precision cutting of ceramic, porcelain, and stone tiles. It features a powerful motor to handle various materials with ease while incorporating a water cooling system to minimize dust and extend blade lifespan. Its durable base ensures stability during operation, making it an excellent choice for both DIY projects and professional tile installations.
