

Compact Electric Urban Tricycle

This compact, three-wheeled electric vehicle is designed for urban transportation. Its compact size and three-wheel design provide maneuverability and stability.

Overview

Compact Electric Urban Mobility

The Compact Electric Urban Tricycle is a specialized three-wheeled vehicle engineered for efficient city transportation. Featuring a fully enclosed cabin for all-weather protection, it combines the stability of a tricycle with the convenience of automotive-style controls. This eco-friendly solution is designed to navigate urban environments with ease while providing a comfortable and secure ride.
