

Compact Electric Vehicle for Urban Commuting

This new energy electric car is a green vehicle designed for low-speed on-road use. It is compliant with L7E and EEC NO.e11*2002/24*1241*00 standards.

Overview

Compact Urban Commuter

This compact electric vehicle is specifically engineered for efficient urban commuting. Featuring an aerodynamic design and a short wheelbase, it offers excellent maneuverability in dense city traffic. Its electric powertrain ensures an environmentally friendly ride without compromising on style or performance.
