

# Compact Electromagnetic Induction Cooktop

This compact induction cooktop utilizes electromagnetic induction for direct and efficient heating. It is designed for modern kitchens, offering precise temperature control and rapid heating in a small form factor.

## Product Overview

### Compact Electromagnetic Induction Cooktop

This compact electromagnetic induction cooktop is designed for modern, space-conscious kitchens, offering a versatile solution for large-sized apartments and contemporary living spaces. It features an advanced main fire center system that delivers focused, high-efficiency firepower for precise cooking results. With its energy-saving design and intuitive controls, this appliance combines high performance with ease of use, making it an ideal choice for professional-grade cooking at home.

## Technical Specifications

Model Number	GZT35-860A
Heating Technology	Electromagnetic Induction
Coil Configuration	Cumulative double coil

## Performance Metrics

Energy Efficiency  
National Energy Efficiency Level 2

### Key Performance Highlights

**2 Level**

National Energy Efficiency Rating

## Features

### Safety Features

- Automatic shut-off
- Cool-touch surface
- Precise temperature control

### Usability

Digital Display, Timer Control, Compact Design, Sleek Glass Surface
