

Compact Enclosed Cabin Electric Tricycle

This compact three-wheeled electric vehicle is designed for urban transportation. It features a fully enclosed cabin, providing weather protection for the driver and passengers.

Overview

Compact Urban Mobility Solution

The Compact Enclosed Cabin Electric Tricycle is an ideal solution for efficient urban transportation. Designed with a fully enclosed cabin, it offers reliable weather protection for both the driver and passengers. Its compact three-wheeled chassis ensures superior maneuverability in congested city environments, while the electric powertrain delivers a quiet, emission-free ride.
